

Extend Patient Care with the Digital Difference of OTO.

Oto for Clinicians software is designed as the CellScope Companion App to fit seamlessly into your workflow across all your devices. Included with your purchase of the Oto for Clinicians, the Companion App allows healthcare providers to easily capture, view and share images of the tympanic membrane for clinical collaboration and patient engagement, medical education, and workflow integration in a HIPAA compliant environment.

Key Software Features

-  Patient Engagement
-  Medical Education
-  HIPAA Compliant
-  Workflow Integration
-  Smart Reference Library

Increase Engagement

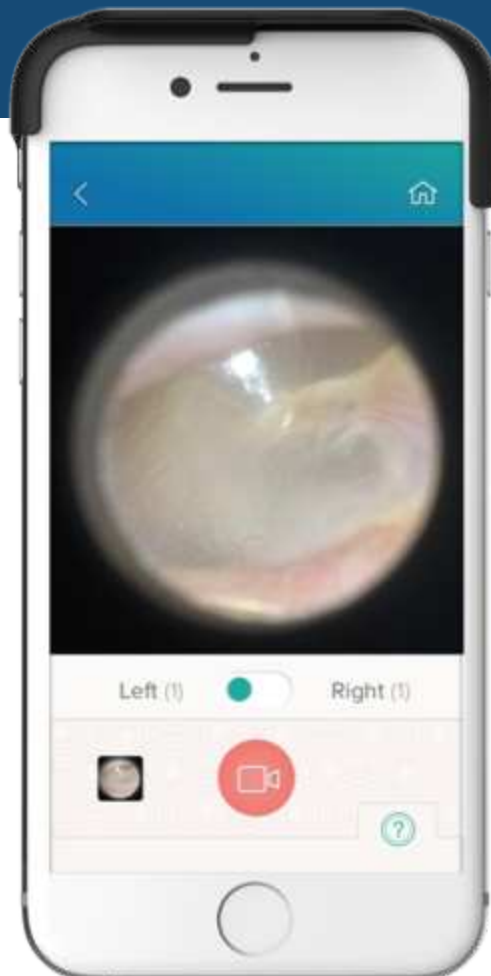

Playback ear exams to educate patients on your diagnosis & treatment plan.

Secure Documentation

Easily integrate with your EMR on our HIPAA compliant web platform.

Visual Communication

Increase collaboration with students and colleagues by easily sharing ear exams.

Smart Reference Library

Improve Medical Education

With the CellScope Companion App you have access to our smart reference library. Now you can train residents, students, nurses and staff using the Smart Reference library to find similar images of ear conditions.
